Mr.J SURVEY AND ENGINEERING

82206 01427, 75985 15550

mr.jsurveyandengineering@gmail.com

About us

The team of excellence, energetic, precision and with well experienced consultants has been established in 2018 to render its valuable service to the society. Crew members bound to work as a family enriched with intimacy, brotherhood and fellowship.

We provide a genuine, a wholehearted bond connection with customers which made them to feel comfortable and good satisfactory manner. Services are completed within the stipulated time or indicated by clients not extending more than that. The company mostly aims at customer satisfaction by doing its work with accurate and detailed manner.

YOUR GRATIFICATION IS OUR REMUNERATION

Crew members

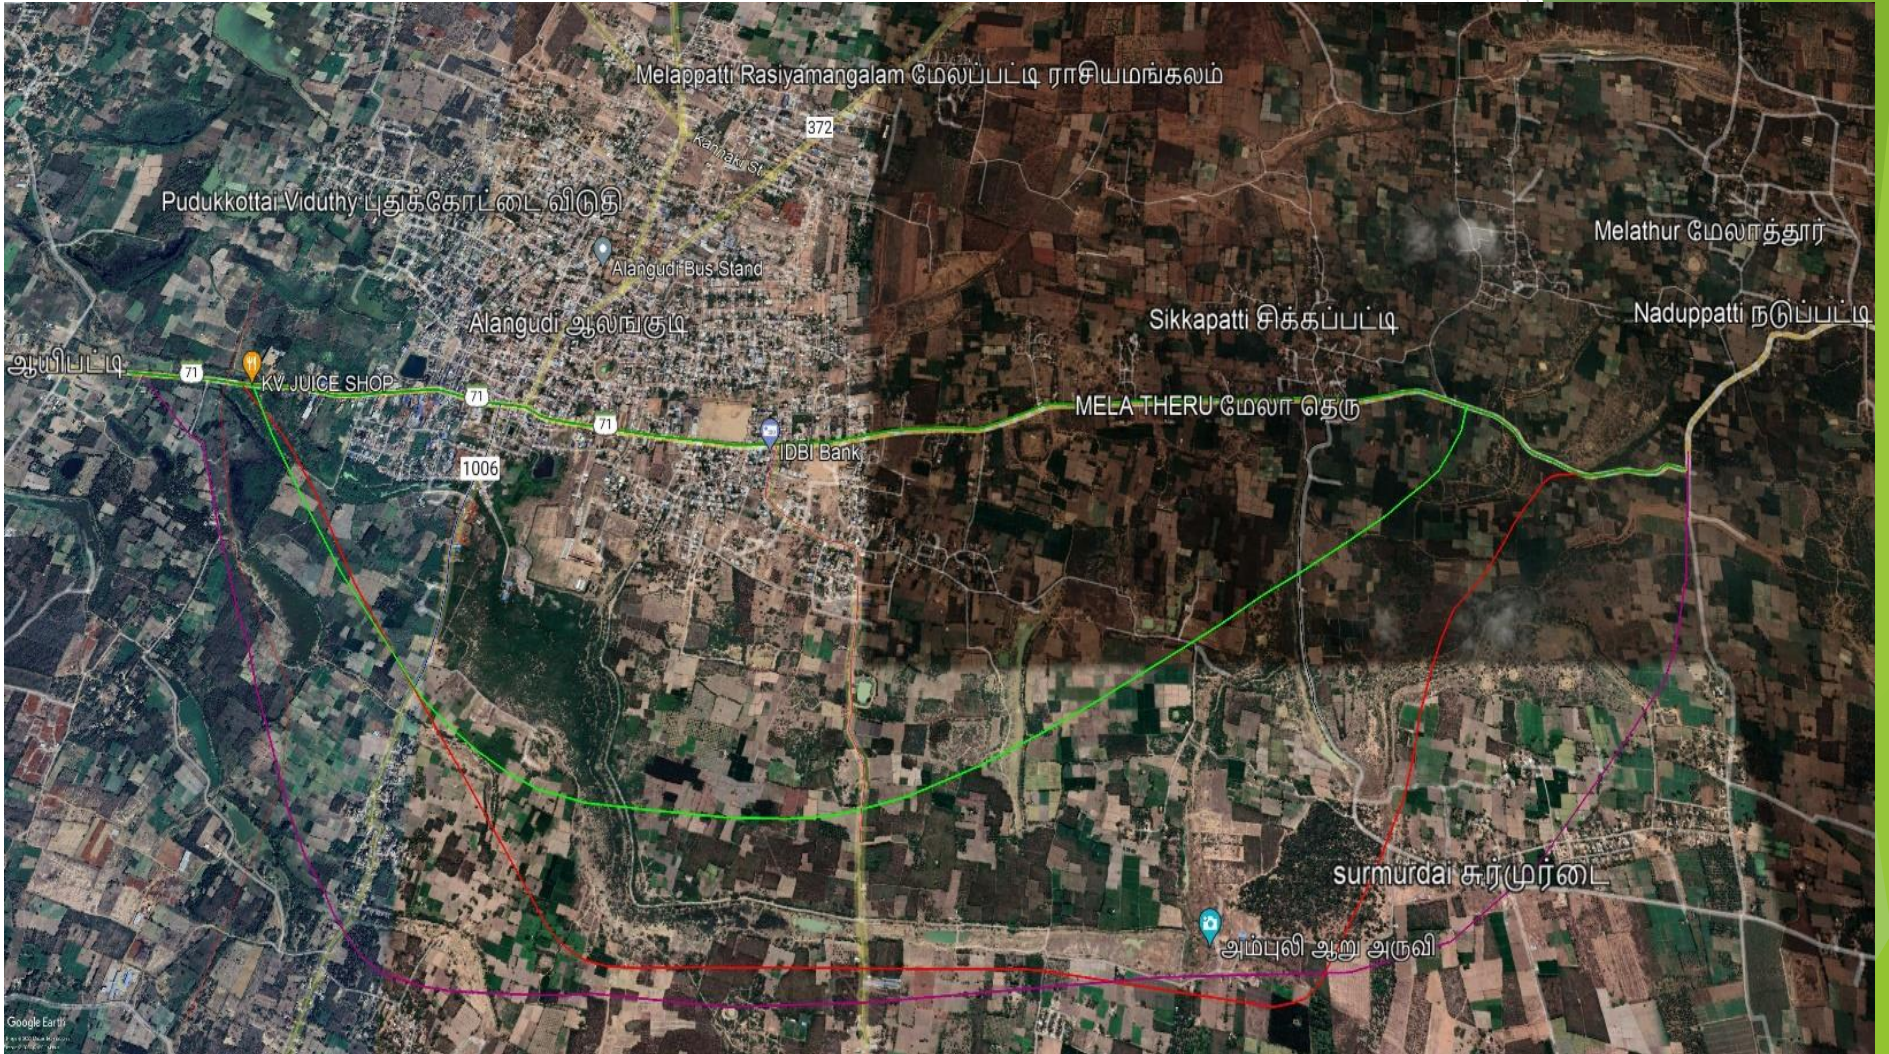

The members of the crew includes five technical, experienced and smart persons. As company always strive to excel a intimate bond with teammates it offers a compatibility, kinship, trusteeship and also provides an environment of being an organized group of family. The company was at all of its time of progressing and completion of its project encompasses the idea and knowledge of both teammates and an entire crew which excludes the discrimincy between ownership and teammates. A great platform has also been provided for young freshers to develop and incultivate their knowledge of technical skill in survey and other required fields.

Project highlights

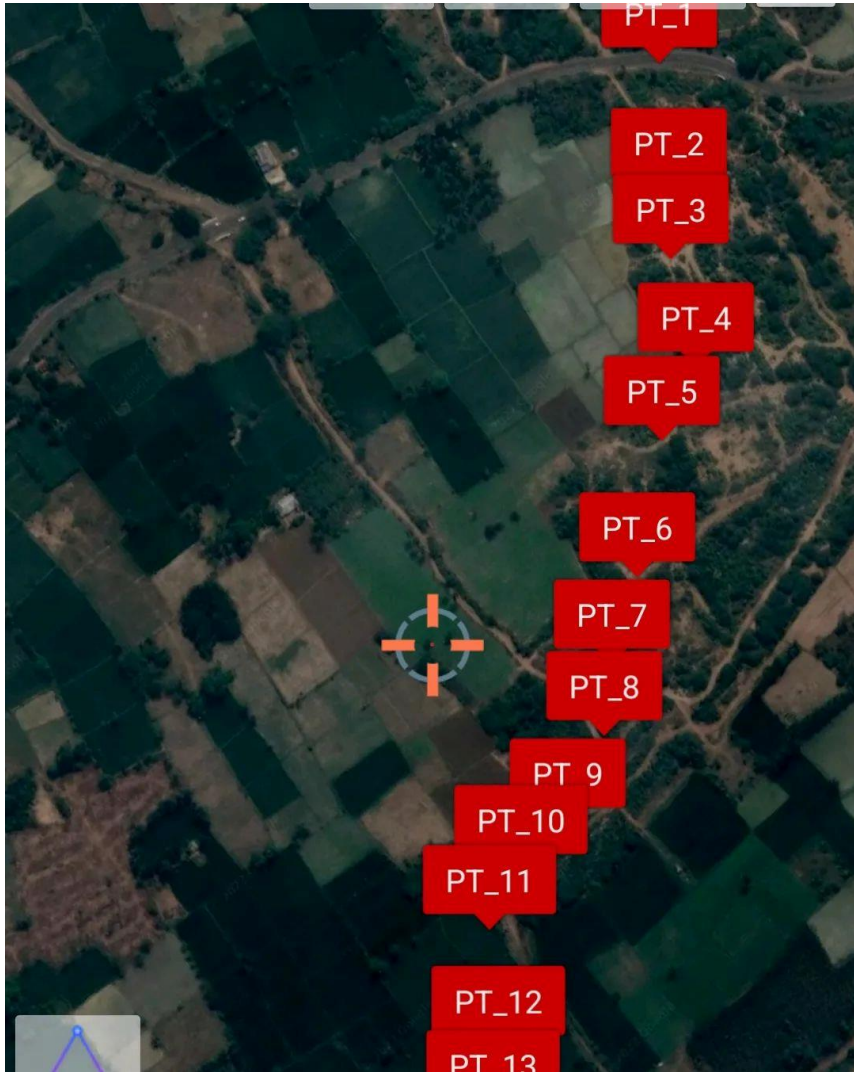

Works done by the company have been of the highest standard. Facilities offered are always based on safety, quality, timely service and an anticipation of client needs with a well experienced, dedicated and equipped co-workers with good technical knowledges.

Our gratitude of service has been extended to many areas and fields, of which highlights are such as **PREPARATION OF DPR OF ALANGUDI BYEPASS** undertaken by TRANSHEIGHT CONSULTANTS COMPANY, BANGALORE of which the company has rendered its valuable service of subcontract in **Field survey and Land procurement survey(LPS).**

The base work had been initiated by receiving the KML (Google earth file) followed by the cleaning process of village site. LPS work had been processed by collecting village map followed by fixing with google map from which survey number for each subdivision are found. Finally the report had been submitted which includes the excluding areas under each subdivision.
